

UPGRADE INSTRUCTIONS

(must be done on the database server)

- 1 Click [Start -> Programs \(or All Programs\) -> FSS -> ASTA -> Stop ASTA service](#).
- 2 Copy FS_SVR_SQL.exe to c:\windows. You can overwrite the existing file.
- 3 Copy the remaining files into the [Installed Drive]\FSS\Update. *(Default is C:\FSS\Update)*
- 4 Click [Start -> Programs \(or All Programs\) -> FSS -> ASTA -> Start ASTA service](#)
5. Log into each POS terminal and ensure they are updated to the correct version. Click on the [“About”](#) button on the left hand side of the application. The version listed here should match the version of the update.

It is necessary to perform these steps in the order they are listed!
